DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1, 3-6, 10-11, 14-15, and 17 are rejected under 35 U.S.C. 102(b) as being anticipated by McMahon et al. (US 4,640,165).

McMahon discloses all the recited elements of the invention including:

- a) a knife roller (e.g., 10);
- b) a cooperating anvil roller having an anvil (e.g., 20);
- c) at least one knife carrying unit comprising a knife holder formed of a resilient elastomeric material (e.g., 30), at least one shaped slot having a circumferentially extending component (e.g., 32a or 32b has a width extending circumferentially) and at least one shaped cutting knife having at least one radially outwardly presented cutting edge (e.g., 34a or 34b).

Regarding claims 5-6, and 17, col. 2, lines 51-53. Regarding claims 10-11, col. 4, lines 66-67. Regarding claims 14-15, col. 1, lines 5-7. Regarding claim 17, a retention mechanism (e.g., 36, 38, 44, 48).

3. Claims 1, 3, 11-15, and 17 are rejected under 35 U.S.C. 102(b) as being anticipated by Gammeter (US 1,577,620).

Gammeter discloses all the recited elements of the invention including:

Art Unit: 3724

- d) a knife roller (e.g., 10);
- e) a cooperating anvil roller having an anvil (e.g., 16);
- f) at least one knife carrying unit comprising a knife holder formed of a resilient elastomeric material (e.g., 32,32a), at least one shaped slot having a circumferentially extending component (e.g., groove on 32) and at least one shaped cutting knife having at least one radially outwardly presented cutting edge (e.g., 11a).

Regarding claims 14-15, the web material is not part of the invention. It merely recites the manner in which a claimed apparatus is intended to be employed. The device of Gammeter satisfies all the claimed structural limitations thus, capable of cutting the recited web material. Regarding claim 17, a retention mechanism (e.g., 12, 13).

Response to Arguments

4. Applicant's arguments filed May 3, 2006 have been fully considered but they are not persuasive.

Applicant contends that McMahon does not disclose the use of a shaped cutting knife capable of being carried within a shaped slot.

The examiner respectfully disagrees. McMahon discloses the use of a straight shaped cutting knife capable of being carried within a straight shaped slot.

Conclusion

5. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

Art Unit: 3724

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
